

BMW E46

## OEM STYLE AIRBOX

Ref. E46AD09

### Options:

- Gloss 2x2

### Kit includes:

- Airbox
- CNC machine-made items of anodized aluminium
- Stainless-steel screws
- Certificate of authenticity

### Characteristics:

- Similar sound to CSL airbox
- No remap needed
- 100% Carbon Prepreg
- Cured in autoclave
- High gloss UV protection varnish
- Perfect fit. No adjustment required
- 2 years guarantee

### Fitment:

- BMW M3 E46
- BMW M3 Z4

### BMW E46 OEM STYLE AIRBOX,

CSL Airbox is one of the most demanded improvements among BMW M3 E46 enthusiastic. That is both for performance gain, and for sound it brings to car. On the other hand, it is a laborious, time-consuming and expensive modification.

For those who are looking for similar sound to CSL airbox but do not look for HP gain, we have developed the Karbonius OEM Style S54 airbox.

It is a simplified version of CSL airbox, that, apart from louder sound to engine (+12 dB compared to plastic OEM) gives awesome appearance and easy installation using stock elbow and MAF.

No needed to install any additional hardware or remap.

\*In SMG version, genuine BMW CSL SMG expansion tank needed.

Regarding power increase, we got +4HP in recent dyno test comparing with OEM airbox. Not really significant considering that dyno can have a 2% margin error. In conclusion, and pending new test in future, we can say no significant power increase and no HP loss.

As usual, piece manufactured 100% in carbon fibre prepreg, cured in autoclave in our facilities in Spain (EU) under strict quality requirement and for qualified stuff.
