

BMW M3 E92

KARBONIUS AIRBOX M/V8

Ref. E92AD001B

Options:

- Finish gloss/mate
- 2x2 / 1x1

kit includes:

- Airbox Plenum
- Elbow
- AirFilter lid
- ITG high flow airfilter
- Certificate of authenticity

Characteristics:

- Power upgrade
- Perfect fitment and easy installation
- Sound enhancement
- 100% Carbon Prepreg and autoclaved cured
- 2 years guarantee

Fitment:

- BMW M3 E90, BMW M3 E92

Karbonius Airbox M/V8 para **BMW M3 E92**,

After seeing that it does not exist any plug and play airbox for S65 engine—neither BMW has an option for this model – we decided to develop an intake system made in carbon fibre completely new, with the aim to improve the engine efficiency , sound and, at the same time, the appearance inside the engine bay.

The **KARBONIUS S65 AIRBOX** has been designed for our engineering team using the most modern technologies with analysis in 3D and in 2D . We have re-designed the genuine airbox, the elbow and the air filter cover, managing to optimize the air flow that enters to the engine and simultaneously to minimize the turbulences inside the airbox system, with the consequent gain of power.

Besides of this gain of power, the **KARBONIUS INTAKE SYSTEM** gives the engine an awesome appearance and an astonishing sound, ang goes varnish high gloss with UV protection.

In **KARBONIUS COMPOSITES** we bet on the quality of our products, which are made 100% in prepreg carbon fibre in our facilities in Spain under ISO 9001 Management Quality System rules by qualified staff. For these reasons, because we are conscious of the quality of all our products, we offer to our clients a guarantee of 2 years against any fault of manufacture. The V8 version of this box comes with the gap for the originals M/V8 badges (not included)
